

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

At 12 o'clock M., this being the time and place appointed by the Constitution for the assembling of the Legislature, the Senate was called to order by the Hon. Clarence E. Case, the Senator from Somerset county, who read the following statement:

He expressed the hope and belief that the business of the session would be transacted in such a manner as would reflect credit upon the wisdom and sincerity of the legislators, and result in the passage of such laws only as would stand the test and be of benefit to the whole people of the State. "May God give me the strength to do the things I should do," was his closing invocation.

The following messages were received from the Governor, by the hands of Mr. Croasdale, his Secretary, which were read as follows :

GOVERNOR'S MESSAGE.

GENTLEMEN OF THE LEGISLATURE:

There would be scarcely any occasion for an extended address at this time were it not for conditions growing out of the war. In former messages I outlined in detail a program for reorganization of the State Government along business lines, and with your hearty and unselfish co-operation that program has been fully carried out. You have provided legislation making possible the co-ordination of departmental activities and the centralization of our institutional property and its control. You have given laws looking toward a comprehensive system of State highways, interstate traffic facilities and port and canal development. In short, you have placed on the statute books all the legislation which was deemed necessary to meet both domestic needs and the emergencies of a war period. Some of these physical developments have necessarily been halted because of war responsibilities, but the laws are on the statute books and I look for a rapid resumption of the projects so auspiciously started.

It is particularly gratifying to be able to point to the splendid financial condition of New Jersey, especially in these days when all outlays necessarily have been abnormal. The State is prepared to meet the problems of reconstruction with a free balance in the treasury of over three million dollars, a condition absolutely unprecedented in the history of the State. I shall go into further detail concerning this and the financial affairs in my message concerning the budget.

PREPARATIONS FOR RETURNING SERVICE MEN.

Out of war, however, there arise conditions affecting industry, health, labor and trade which demand the earnest consideration of every State Government, as well as the National Government.

For many weeks our State Department of Labor, through its employment bureau facilities and its careful post-war survey of industry, has been securing the means of livelihood for discharged soldiers and sailors—actually getting them jobs. Other State departments have been quietly studying conditions and preparing and are ready to equip you with all details and possibilities of the situation. By proclamation the efforts of all State and municipal departments and of all organizations have been mobilized and concentrated in one central channel toward the desired end. But more must be done, and on a larger scale. No task confronting you is nearly so important as providing for the smooth, convenient and satisfactory return to peaceful pursuits of the one hundred and fifty thousand Jersey patriots who within the last two years unselfishly gave up their ordinary occupations for military and kindred service. They dedicated their lives to the common cause; the least we can do is to dedicate our resources to their comfort and welfare.

No doubt private business, with its trained efficiency and unflinching resourcefulness, will absorb more of this released labor than we suspect. Nevertheless, it would be nothing short of a tragedy if without proper preparation the millions of men in the military service were to be suddenly and at one time thrown back into a labor market glutted, perhaps, by the slackening of activities naturally to be expected in munition factories and other strictly "war enterprises." The Federal Government appreciates this situation and will doubtless take such steps to meet it as will require the hearty co-operation of all State governments. New Jersey should be ready to give this co-operation without stint, and, as usual, anticipate the responsibility.

PLANS FOR FEDERAL CO-OPERATION.

I bespeak your prompt and earnest consideration of some practical plan for acquiring through co-operative Federal and State action some of the vast acreage of cut-over land in New Jersey, and also cleared land that is idle, for the purpose of providing farm homes for returning soldiers and sailors. New

Jersey has available land—plenty of it—and I am sure we are ready to look after details of obtaining and parceling the farms if the Federal Government will attend to the financing. In the latter function the Federal Government has a much freer hand than the State. As one concrete suggestion, and awaiting definite Federal financing, I call your attention to the possibilities for so safeguarding and refining our Homestead Association Act (P. L. 1888, page 231) that these organizations be encouraged for the purpose of co-operating with the plan of Federal land banks and thus enabling service men to secure valuable farms without a penny of capital. These banks advance fifty per cent. of the purchase price for farm land, taking a mortgage payable in forty annual installments. Our Homestead Associations, if properly stimulated and encouraged, would play an important part in those cases where the seller of the farm declines to take a second mortgage for the balance of the purchase price; the association would take the second mortgage and advance the balance. This is one very successful function of the Hebrew Agricultural Aid Society, endowed with the Baron de Hirsch Fund, and I see no reason why the principle and practice cannot be extended for the benefit of all discharged soldiers and sailors through our encouragement, in every proper way, of associations formed for this purpose and adequately endowed by public-spirited and patriotic citizens of this State.

I submit, also, that the time is opportune for New Jersey to urge the Federal Government to take advantage of our legislation of 1917 and join with New Jersey in the immediate building of a cross-State ship canal. Federal legislation is pending. Here is a public work, not only highly valuable in the interest of the nation's trade, but also offering limitless opportunity for the absorption of labor. Of course, immediate action is essential if the project is to serve the purpose of reconstruction. But nothing is impossible where there is a will. If the Federal Government is ready and acts, I recommend that New Jersey proceed immediately with its part of the bargain. As an augury of good faith let us, at this session, actually appropriate the money, contingent upon favorable action by Congress.

Of course, you will want to make proper financial provision for continuing the State Council of Defense, which will be helpful in all communities in the problems attending demobilization, and also for the Federal-State-Municipal Employment System, which is now exceptionally well organized in our State and already a potent factor in the solution of all employment problems.

STEPS REQUIRING STATE INITIATIVE.

In addition to these steps of co-operation, I believe the problems following demobilization sufficiently important to warrant New Jersey taking the initiative as well.

Public works in both State and municipality which have been held up more or less by embargoes during the war should now be pushed with all intelligent vigor as one solution of the problem. Never was there less excuse for narrow, demagogic objections to the spending of public moneys wisely on needed public improvements. Under any circumstances I question the wisdom of political parties challenging each other or bidding for popular support on the alleged accomplishment of spending less money. New Jersey should spend more than it does on its roads, its institutions, educational and charitable, and improvements in the interest of happy, contented citizenship. Inability to expend public moneys prudently and intelligently is a political liability quite as intolerable as extravagance and waste; in fact, it amounts to the same thing, for public wealth uninvested, like the horse in the stable and idle machinery, represents loss. But, now, facing as we are the necessity of meeting exigencies and emergencies incident to post-war adjustment, the false economy of refusing to progress because progressing costs money is revealed in all its folly and littleness.

PUSH ROAD BUILDING AS ONE SOLUTION.

At this time our greatest public work in New Jersey is the State Highway System, and I believe this project should be pushed so vigorously that it will provide employment for thou-

sands of men returning from military service, if not actually in road building itself, then in the various industries from whence the supplies and equipment for road construction come.

I am aware of the fact that the platforms adopted by both political parties last fall promised a suspension of highway taxation until such time as hostilities ceased and normal prices returned. The first of these contingencies is disposed of; hostilities have ceased. The second is as emphatically satisfied when it is taken into consideration that the only tax levy which this session of the Legislature could possibly suspend would be that of 1919-20, or fees collectable in December next, and I believe it will be conceded that prices of materials and labor will be as nearly normal at that time as we can ever hope to have them. Nothing would be gained by paralyzing highway building in 1920 or later. In fact, actual harm would be done taxpayers of the State, for important roads which must be maintained would be going to rack and ruin in the meantime, occasioning a larger expenditure when the work is taken up ultimately. The sum of about six million dollars has been collected in the past two years under our scheme of raising three million dollars per year for a period of five years for our highway system. Under the first three million dollars contracts have been let for work on ten of the routes outlined, and I am advised by the Highway Department that during the coming year it will be possible to proceed with and complete all of these outstanding contracts, which were temporarily suspended under Federal orders. Again, the department has before it a program covering the work intended for 1919, to be paid for from the second tax levy of three million dollars, and purposes to have plans prepared so that contracts may be let for the work under this program as soon as the construction season opens. Manifestly, this much of the road program, already in process, will afford a large and expanding field for labor, and I feel that nothing should be done which would in any way curtail the activities of the Highway Department subsequently. Let us encourage, too, treatment of dirt roads and other purely county or township highways by some common, State-supervised formula, so that

these roads will not be things apart, but important links in the State chain of highways. The legislative committee will have important recommendations on this subject, and I bespeak your earnest consideration of the concrete form in which the matter will be presented.

HIGHWAY DEPARTMENT SOLIDLY FOUNDED AND PREPARED.

May I at this point digress for a moment to call your attention officially to facts touching upon the thorough organization and actual constructive accomplishments of the Highway Department as constituted in New Jersey. This is important, in my judgment, because it is your plain duty to stimulate and encourage in every way the Highway Department, in the big and important task ahead, if it is soundly organized and prepared for the job. What are the facts? The Highway Department, notwithstanding obstacles due to the war which I have recited elsewhere, is to-day a going concern with outstanding contracts amounting to \$2,500,000.00; and it will be ready in the spring to let additional contracts to the amount of \$3,000,000.00. Considering the State Highway tax levy of \$3,000,000.00, the Motor Vehicle Fund apportioned among counties for road purposes, of \$2,000,000.00, the State Aid Appropriations to counties of \$500,000.00, the Township Aid Fund of \$105,000.00, and the amounts spent by the various counties in conjunction with the State Motor Vehicle Fund and State Aid Fund over which the Highway Department exercises supervision by approval of plans and specifications and inspection—considering these latter amounts of \$3,750,000.00, it will be seen that the annual business of or funds administered by our Highway Department aggregates the grand total of \$9,355,000.00. Contrast this with the further fact that the total annual cost of operating the Highway Department, including salaries, rentals, advertisements, postage, expenses of field forces, expenses of commission and the like, is \$260,000.00, and it will be seen that it costs the State but \$260,000.00 to administer \$9,355,000.00, or a total expense of administration amounting to about three

hundredths of one per cent. Further than this, the Department and its work are furnishing a splendid means for a practical adaptation of the State-use system by furnishing healthful employment to our institutional inmates. We shall have approximately sixteen miles of highway routes under construction by inmate labor during the coming summer, employing about 375 men, of which 225 will be quartered in camps; 75 will live at the Trenton institution, and 75 will live at the Rahway Reformatory. In addition we are mechanically equipped for and propose removing snow from the important Lincoln Highway this winter, and on this work inmate labor will likewise be used. These are facts which I ask you to bear in mind as having an important bearing in connection with any and all legislation concerning the future of New Jersey's highways.

OTHER SUGGESTIONS FOR INDUSTRIAL STIMULATION.

In addition to the highway system, New Jersey holds much opportunity for assisting on its own initiative in the solution of the labor and industrial problems.

First, for instance, New Jersey is the very center of shipbuilding activity. It may be that you will be called upon to provide legislation assisting in giving permanency to these great shipbuilding establishments which have reared themselves practically over-night upon salt marsh. Any suggestions would naturally come from the industry itself.

Second, practical legislation may be found necessary in order that our public school system may lend itself to the ready rehabilitation of soldiers and sailors wounded in the military service.

Third, our river traffic and port projects can be so encouraged that a new demand will be created there for labor and industrial supplies.

Finally, let us not forget that the surest and most lasting policy to adopt in order to insure employment for all classes is to encourage business activity; to offer every co-operation with the construction of public works. Private business should be assured

that there will be no unnecessary interference and, with the resumption of activity in all lines, idle labor will readily be absorbed and the problem of employment will solve itself.

All the charts and surveys in the world and all the high sounding, demagogic, Utopian theories for solving the problem over night to the contrary notwithstanding, the only solution to the unemployment problem is to provide the man with a job. Encourage healthy, legitimate business enterprise, and in the natural order of things the jobs will be waiting for the men to fill them.

I feel confident you will grasp every opportunity, respond to every call.

A STATE GRATEFUL TO ITS HEROES.

By way of summarizing the industrial adjustment subject, let me say that unless we fully measure up to the vital needs of the day we are showing ourselves less efficient, less arduous in our patriotism, than those fellow citizens who risked everything, sacrificed all, for our political salvation. They have fought our battles of war for us; now let us fight their battles of peace for them. The heart of every Jerseyman quickens with pride and adoration as we contemplate their patient fortitude and cheerful sacrifices amid the cruel punishment and indescribable discomforts of St. Mihiel, their stout courage under the fire baptismal of Bonvaux Wood, their dogged persistency in the Argonne and before Verdun, and their irresistible valor and triumphant achievement on the Meuse and at Sedan. Our enthusiasm is unbounded, our appreciation defying expression, when we realize that it was the Jersey doughboy who pointed the wedge that crumbled the citadel of Hun defiance at Grandpre, that when hostilities ceased it was the Jersey doughboy who was right at the heels of autocracy's forces, fleeing in disorder across the Meuse and beyond. Ungrateful, indeed, we would be if we did not take every means to demonstrate our appreciation. The mayors of New Jersey's cities, as you know, are striving as a body to arrange for a proper celebration, uniform throughout the State, in honor of the homecoming of our warriors. Their

further object is to encourage the construction of necessary public improvements in all communities as memorials, suitably dedicated to the heroism of the Jersey boys of 1918. As a State we shall want to encourage these practical plans in every possible way, and legislation will probably be submitted to you to give municipalities more power in this connection.

HISTORY OF JERSEYMEN IN THE WAR.

All of us are so proud of the courageous achievements and recognized efficiency of Jerseymen in the war, so deeply appreciative of their noble sacrifices, that we would do more than celebrate, erect memorials and provide opportunity in civil life for those so fortunate as to return to us. We would collect and preserve and hand down to posterity the glorious record of their unselfish dedication and fine patriotism. I most earnestly ask for legislation authorizing and financing the preparation and publication of an official honor roll which will contain a complete historical sketch of every Jersey soldier's participation in the greatest war of all history. In order that this important work may be carried out thoroughly and expeditiously, under some responsible State head and yet without necessitating the creation of any new bureaus or boards when our present policy is to consolidate and co-ordinate governmental machinery, I suggest that in this legislation the State Librarian be charged with the responsibility of successfully completing this task, at a proper additional compensation, in order that the appropriation may be expended under his personal direction and supervision, and conducted in co-operation and collaboration with the State Adjutant General and such Federal departments as may be found necessary.

ENCOURAGEMENT OF EDUCATION IN HEALTH.

Public health as a responsibility of government has taken on new importance as a result of war-taught lessons. The operation of the national selective service regulations disclosed a percentage of physical disability wholly inexcusable in an enlightened age.

Practically one-third of those called in the draft were found physically defective. What a travesty on our present policy in this connection, and what an opportunity for a real State investment! Our duty is to correct it by paying more attention to child hygiene, and I recommend not only that you continue to give the State's financial support to the Federal-State campaign of education, but also that you revise the school laws of the State in order that this vital subject of child hygiene be given the relative position among functions of the public school that its importance demands. The war has taught us the value of preventive medicines and given physicians and nurses equal eminence as educators with teachers in our schools and colleges. It has taught us the necessity of a new and more understandable relationship between the home, the school and the factory; that we must employ the powers of government to protect the bodies of our school children and our young workers from impairment, to save their brains and their souls from starvation.

PRACTICAL MEASURES AGAINST VENEREAL DISEASES.

One of the gravest public evils and dangers greatly emphasized, if not entirely disclosed, by the war calls aloud for intelligent, concerted public treatment. I refer to the alarming prevalence of venereal disease. Neither a false sense of the delicacy of the subject nor a natural desire to shift responsibility for a complex problem to the medical profession should influence us against facing this condition very frankly and using the powers of government to improve it in the interests of humanity. An official United States Army report informs us that three per cent. of the million draftees whose examination blanks first reached the Adjutant General's office in Washington had a venereal disease when they reported at camp; that out of every one hundred men reporting from New Jersey in this first class of a million draftees one and fifty-five hundredths per cent. was afflicted. I am informed that over six thousand cases were under treatment at Camp Dix during a period of about six months; that the treatment of such cases at Camp Dix alone cost the Government some-

thing like \$70,000 per month, not to mention the fact that of course the victims were useless from a military standpoint, and therefore added so much to the average cost per man of equipping the soldier for fighting. Reliable surgeons inform me that all of these cases were contracted prior to enlistment; that the men in many cases labored under the impression that they did not have the disease, owing to the faulty character of the treatment which they had received either from the drug store or from physicians unskilled in the special treatment required. Of course, all this ugly evidence discloses the lack and the vital necessity of some established place in all large communities where the proper treatment for these diseases may be had. I appreciate that New Jersey has legislation which makes the reporting of venereal disease cases obligatory. Reporting is all right as far as it goes, but the mere reporting of a disease neither prevents nor cures it. What is most needed is an easily accessible place where the right kind of treatment may be given without cost or embarrassment. Under the terms of the Chamberlain-Kahn bill New Jersey has received an appropriation of about \$27,000 from the Federal Government for the campaign against venereal diseases, and the Federal Director for New Jersey is established here and doing good work. I understand that hereafter no appropriation will be forthcoming from the Federal Government for this purpose unless the State itself makes an appropriation, in which event the United States will duplicate the State appropriation up to \$27,000. I very strongly urge the passage of an act which will not only fix a sum for New Jersey to appropriate in connection with the Federal plan of co-operation, but which will also, in some practicable way and under the Federal Director as a general State supervisor, encourage all larger municipalities and counties where no large cities are located to establish and maintain dispensaries in connection with municipal or other hospitals, or, apart from such institution, where venereal disease may be treated free of charge and under the direction of competent physicians and surgeons responsible to the local governments and to the State. It occurs to me that our State policy toward the effective treatment of tuberculosis could be made to apply in a very practical way to the venereal disease scourge. Some New

Jersey cities are voluntarily experimenting with intensive treatment of venereal diseases, but the effort should be uniform throughout the State since the disease is confined to no particular locality.

ADDED POWER FOR HEALTH AUTHORITIES.

I would also call your attention to the necessity of clothing our State Department of Health with added powers in order that it may the more adequately cope with general epidemics; that is, epidemics which are not confined to any one locality, such as occurred recently in endeavoring to carry out a State policy to meet the ravages of influenza. The department should have full power to enforce necessary quarantine regulations anywhere.

I have already recommended that the school laws be changed so that additional means may be found for the re-education of wounded soldiers and sailors, and in order that more attention be given to the physical well-being of our young manhood and womanhood. In addition to this I understand that a comprehensive report will be made to you by the Legislative Committee, which for some time has been investigating the school laws with a view to necessary revision. I recommend laws which will carry out the practical recommendations of this committee.

A NEW VISION FOR THE PUBLIC SCHOOL.

Conditions existing previous to our participation in the world war disclosed the fact that heretofore our devotion to the fundamental principle of an open door to all nationalities asking political and religious freedom has blinded us to the necessity, as a matter of self-preservation, of the prompt Americanization of foreigners voluntarily taking up their residence in America. As a factor in such Americanization the potency and effectiveness of the public school system cannot be overestimated. The language and customs of America, including the political fundamentals upon which this government was erected, and the duties and responsibilities of citizenship, should take on new importance in the public school curriculum. A way must be found to teach

them by the same practical and resultful method which has enabled hundreds of thousands of American boys, devoting only a few hours each week to the study of French during the period of military service of only six months in France, to speak French very comfortably and with an average vocabulary of a thousand words. I speak of this because it seems to me to contrast very sharply with the fact that in the past the average student of our school and college has shown considerably less mastery of foreign language after from four to six years of effort. In our revision of the school laws I believe we at all times should give preference to the practical over the purely theoretical; that we should guard our schools no less against the selfish or misguided schemes of the faddists than against the passiveness and idolatry of the past which keeps us in a rut. Legislation tending to further remove the schools from political control and to attract to the teaching profession through adequate salaries and congenial environments men and women of high attainment and ambition to serve commensurate with their ability, will assist us to reach the goal so much sought in public education.

FUTURE MILITARY POLICY OF STATE.

It is much too early to formulate a definite military policy for the State. This, of course, must be wholly contingent on the military policy definitely adopted for the future by the Federal Government. Our National Guard lost its former unit identity in the process of federalization. Will there be a National Guard in the future? Will the National Guard Army be discharged as U. S. N. G. A. Reserves? Will the status and the national policy be such that the States would be in a position, if they saw fit, to revive National Guard organizations as such? The answers to these propositions can be merely conjectured. In the meantime, I conceive it to be our duty to continue and encourage in every possible way the present State Militia. Further, I recommend that you provide any additional legislation that may be needed to continue, until we see further, the State Militia Reserves, for like the State Council of Defense, these local organizations will prove helpful in the work of reconstruction and industrial adjust-

ment. Where we have the organization, it is merely a matter of detail to rearrange its functions.

SOLDIERS' VOTING ACT CHANGES.

While the war is over it is possible that a considerable number of Jerseymen may be called upon to remain away from their legal residences in camps here or abroad for some time to come. In view of this fact I believe certain changes should be made in the soldiers' voting act based upon the recent and rather unsatisfactory experience. The provisions in the present statute obliging voting upon informal ballots to be done on election day and thereby necessarily allowing the boards of canvassers a period of thirty days after election in which to count ballots is, in my judgment, impractical and a direct invitation to fraud. The law should be so amended that the balloting may be done in a period sufficiently in advance of election day to make possible the receipt and counting of all ballots within a period not longer than ten days following the election. Certain duties imposed upon the Secretary of State in the present statute, such as ascertaining the names and post-office addresses of all men in the service at a certain period, have been found impossible of performance, and therefore should be modified in order that invitation for successful legal attack on technicalities be removed.

REFORM OF PENSION SYSTEM.

A legislative commission has been investigating State and municipal pensions as they apply to public school teachers, policemen, firemen and other public employees. This commission has reached the conclusion that our pension system is not on a sound financial basis, and that in some instances the pension methods are inequitable and unfair alike to the tax payers and to the class of employees affected. Of course, this is a situation so serious that it merits prompt and earnest legislative consideration. I recommend the careful consideration of bills which will be presented to you for the purpose of correcting the evils disclosed.

POSSIBILITIES OF HEALTH INSURANCE.

No consideration of genuine pension reform, however, can be complete unless it contemplates as the logical and ultimate foundation of the pension system health insurance. I know what a vast subject this is and appreciate the difficulties which have conspired to make all past attempts at consideration merely cursory and superficial. Yet I cannot refrain from leaving it with you as a thought, whether it is found practicable to attempt it in this session or postpone it for further consideration. Health insurance would seem to be even more vitally important to any pension system than New Jersey has found compensation insurance to be to its workmen's compensation system; in fact, health insurance would provide additional supports for our workmen's compensation system by conserving the physical vigor of our people against the constantly increasing demands of industry upon physical endurance. By automatically providing medical care and health instruction it is both curative and preventive and therefore must certainly operate to reduce the burden of any compensation or pension system, no matter what class of private or public employees are affected.

INCREASED COMPENSATION FOR INCAPACITATED WORKMEN.

It is our duty, it seems to me, to take into consideration at this time the fact that altered living conditions, involving greater expense in all human activity, have rendered the schedule adopted originally with our New Jersey Workmen's Compensation Act out of date and inadequate. The schedule needs revision in proportion as it requires more money to-day for the family of an injured workingman to live and for the latter to secure satisfactory treatment and aid than it did at the time our law was enacted. New Jersey was the first State in the Union to pass a satisfactory compensation act as a fair and sensible substitute for the old, unfair, costly and wholly unsatisfactory method of emphasizing through law suit an employer's liability. We have an admirable statute and we are justly proud of it. Nevertheless, it may not be

expected to remain a thing of admiration and an instrument of exact justice unless we keep it up to date and in concert with changing conditions. I firmly believe employers will heartily agree that the present rates of compensation are inadequate to meet the needs of the incapacitated workingman and his family or other dependents. To this extent the law should be improved.

RE-EDUCATION, REHABILITATION FOR INJURED WORKMEN.

While we are considering improvements in our Workmen's Compensation Law and health insurance, may I suggest that the principle of physical rehabilitation, and vocational training and guidance should eventually be extended to the industrial worker, as well as the injured soldier. It would certainly seem to be a far better economic proposition to expend the compensation stipulated for such rehabilitation and vocational instruction as might be necessary to make an injured worker a self-supporting citizen rather than to have this income expended with the sole thought of tiding the injured worker over the period when he is physically unable to work and leaving him at the last payment utterly unable to properly assume his previous obligations.

Neither is it sound policy to make payment of compensation predicated upon a moneyed consideration for a permanent injury, if a plan could be devised by which the man so afflicted could be placed in the position of a self-supporting worker rather than that of a pensioner. Moreover, the worker should not be penalized for an injury by being made solely a dependent. Re-education, fitting him for some service of a valuable nature, removes him from a personal humiliation that he never deserved and is far more businesslike.

This subject is worthy of particular attention at this time by reason of the fact that much thought and energy will be given to this problem in helping the wounded soldiers, and much practical benefit can be derived from the experience gained. The organization and equipment found necessary for helping the soldiers could perhaps be made available for the injured industrial worker. I commend this undertaking to your careful consideration.

ADEQUATE REVENUE FROM STATE SERVICE.

In these times, when the burden upon taxpayers generally is necessarily heavy, owing to both national and local demands, it seems to me very important that the State should receive all possible revenue that may in justice be expected for State service. Last year legislation of this character was provided resulting in many thousands of dollars of additional revenue, particularly in the Department of Labor. May I suggest that department heads be consulted by legislative committees for suggestions upon similar legislation this year?

TOLL BRIDGES.

Your attention will be directed to confusion in existing laws for the elimination of toll bridges. I urge amendatory legislation, so that a workable proposition, alike in Pennsylvania and New Jersey, may be devised for the condemnation of these structures when that course is necessary.

GROSS RECEIPTS TAX ACT.

While it is generally conceded that the gross income tax is a more scientific method than the old property tax, still I am sure it was not the intent of the last Legislature that the gross receipts tax act upon public utility companies should operate to the disadvantage of any municipalities through loss of revenue. If upon investigation such a result is apparent, I recommend added legislation designed to correct this situation, but maintaining the new system.

POST-WAR HOUSING PROBLEMS.

When the war started the State Department of Labor had made considerable progress on a plan to have manufacturers locating in suburban towns give consideration to a housing program at the same time that the sufficiency of their factory building and equipment was being passed upon by State officials. Of

course, the war interrupted any extensive operation of the plan, but if anything, the elaborate housing programs engineered by the great industries springing up as a result of the war merely served to emphasize the importance of government paying attention to housing conditions as well as to the safety and comfort of factory construction. I heartily favor any legislation which may be found necessary in order that through our Department of Labor, and perhaps with the co-operation of Federal authorities, a standard housing plan may be adopted in connection with our industries and effectively carried out. It encourages healthful home surroundings and town development and discourages overcrowded tenements with the many consequent evils arising thereby.

A PERSONAL WORD.

I look forward with absolute confidence to a businesslike session, which will adequately serve the real needs of the hour and yet omit legislative surplusage serving purely personal ends and clogging the statute books. I feel certain that the even division of political power in one branch of the Legislature will not in any way interfere with the harmonious relations which we have hitherto enjoyed in our common task, or militate in any way against legislation so urgently needed in the interests of national and State welfare. I offer executive co-operation of the heartiest character, without regard to the personal or political authorship of bills, to the end that this session may well serve the purposes and needs of the people whom we represent.

May I embrace this opportunity, the last general message I shall submit to you, to express my earnest and sincere appreciation of the uniform co-operation and consideration those of you returning have universally shown, and to express the conviction that this relationship will continue whatever our separate responsibilities may be.

WALTER E. EDGE,
Governor.

BUDGET MESSAGE.

To the Legislature:

Pursuant to Chapter 15, Laws of 1916, I am herewith transmitting my recommendations covering the budget of appropriations for the State's fiscal year ending June 30, 1920.

It will be noted that the total recommended is \$9,930,806.14, exclusive of certain improvements and additions recommended to the State Capitol plant, contingent State-use developments, the provision for the Newark Normal School and for acquiring right of way for a cross-State ship canal, all of which I will discuss later. This total is an increase of \$444,150.29 over the total appropriation of the present fiscal year, amounting to \$9,486,655.85, a proportionately small increase in comparison with the extraordinary conditions which the Budget Commission was obliged to meet.

For instance, of this increase \$234,664.46 is recommended for the budget of the Department of Charities and Corrections, which now, of course, comprises all institutions in New Jersey, both charitable and correctional. This increase for the Department is largely represented in the continued rising cost of food and supplies; furthermore, the Department is planning to accommodate about 800 additional inmates scattered throughout various institutions. Necessary increased rates to be paid for State and county institutional patients have also figured in the increase. Careful investigation has convinced the Board of Charities and Corrections, in which judgment I concur, that a complete rearrangement of policy is necessary to secure the best results from the Women's Reformatory at Clinton. The desire is to make of this institution more of a reformatory as at Rahway, rather than alone a prison. The rather large increase in appropriation recommended for this institution is in contemplation of this new policy. A substantial saving has been effected, and has made possible the comparatively slight increase in consideration of abnormal market prices, by reason of the fact that for the first time in the history of institutional management re-

quests for appropriations covering food and other maintenance items are based on a standardization fixed in accordance with dietaries adopted.

The total amount recommended for salaries and wages of \$3,846,124.00 is an increase of \$187,170.00 as compared with an increase in the same item of last year amounting to \$292,688.00, and includes a much belated recognition of the justice of raising the remuneration of teachers in our normal and other institutional schools. In other words, the increase recommended this year is but 5 per cent. compared with 10 per cent. last year. Conditions with which all are familiar due to the war, affecting both farm help and inside help, had to be met, but, in addition, the chief reason for the 5 per cent. increase now recommended in the items of salaries and wages is the fact that civil service standardization, as authorized by the last Legislature, has been taken into consideration in making recommendations for the coming fiscal year. This standardization, of course, provides for certain salary increases automatically at certain periods of the year, when recommended by departmental heads.

Because of amendments to the budget act provided by the last Legislature, it is no longer necessary to confine budget recommendations within the income of the State for the fiscal year. This provision makes it possible for New Jersey to take advantage of the great free balance over and above all obligations estimated at about \$3,500,000.00 which will be in the treasury at the end of the current fiscal year, which speaks volumes for the successful financial management of public affairs which the State has enjoyed. As the income for the coming fiscal year has been estimated at about \$9,300,000.00, we will, therefore, have total resources in excess of \$12,500,000.00 from which to conduct the State's business for the coming year. As the total estimated as necessary for what might be termed ordinary expenditures is about \$9,900,000.00, we shall have a balance of nearly \$3,000,000.00 from which to finance State-wide improvements which seem advisable. The National Government has urged that public works be resumed everywhere in order to supply employment for labor returning from the war and war industries, and the State Government has asked business to resume pre-war enter-

prise in order to help absorb this same supply of labor, and, of course, at the same time take care of returning soldiers and sailors. In this respect the State should be consistent. The State's business is no different from any other. Let us be enterprising and employ as much of our surplus capital as is wise and practicable in the projection of improvements which are necessary, and which will, at the same time, furnish a new field of endeavor for labor.

In this connection I am recommending an appropriation of \$1,000,000.00 for the purpose of acquiring, either through gift, purchase or condemnation, a strip of land 1,000 feet wide from Raritan Bay at Morgan to the Delaware River at Bordentown, for purposes of a cross-State ship canal, as provided by Chapters 93 and 128 of the Laws of 1917. This recommendation, in accordance with our legislation of 1917, is, of course, contingent upon the Federal Government appropriating sufficient moneys for the actual construction of the canal. A bill to this effect is now pending in the National Congress, and I feel that we should be ready with our State appropriation the moment the Federal money is available.

Inasmuch as it is reasonable to assume that in the event of favorable action on the part of the Federal Government actual operations would require some time, I believe dividing the \$1,000,000.00 in two \$500,000.00 appropriations would meet all the requirements of the State. I so recommend.

I am also recommending an appropriation of \$350,000.00 for the purpose of building a new wing to the State Capitol. I am convinced that this would be a sound investment and a movement in the direction of economy, as well as a needed public improvement. It is now costing the State about \$7,000.00 per year to rent for office and other purposes building space in Trenton outside of the Capitol building for use of State departments, and this must be considerably increased in the immediate future. This loss is magnified far in excess of the actual money figures by the impossibility of securing the best results under conditions of congestion and the loss of time and money in putting up with such inconveniences as traveling extraordinary distances between departments.

I am also recommending an appropriation of \$50,000.00 for the purpose of constructing a State warehouse. Such an institution will result in a saving to the taxpayers of thousands of dollars annually in the important function of purchasing food and supplies for State departments and institutions. It will not only permit the State Purchasing Agent to buy goods, not merely when they are needed, and when the market price is low, but it will also permit him to buy in bulk lots and thus receive the benefit accruing thereby in a lower cost price. Recent experiments of the State Purchasing Agent with the business-like policy of buying in bulk when the market is down have resulted in a saving of thousands of dollars, even though it has been necessary to store the goods so purchased in privately-owned warehouses and pay the storage fees. Let us save even the storage fees and permit the purchasing department to function on a still larger and more business-like basis by having our own warehouse. It is important to bear in mind that it is practically impossible for the State to get the benefit of the lowest obtainable cash prices—and this is essential to any successful business, whether State business or otherwise—unless the purchasing agent is able to buy in bulk quantities; manufacturers and original sources of supply will not, as a rule, enter into competition with jobbers and distributors for shipments to various points in small lots, but will classify the State as a distributor provided shipment is made by them to one central point in bulk lots. In other words, the State can buy direct from the manufacturer and get the resultant benefit in price if it has its own adequate warehouse facilities.

I am suggesting an appropriation of \$20,000.00 for the purpose of building a garage to house cars owned and operated by State departments. This is another recommendation in the interest of economy, for, at the present time, it costs the State between \$7,500.00 and \$10,000.00 per year for the storage and washing of cars alone, and these figures are more apt to increase than to decrease. As \$10,000.00 represents interest on a sum of more than \$160,000.00, it is plainly evident that the expenditure of \$20,000.00 for our own State garage is an excellent investment.

I desire to call your attention to the fact that our budget in New Jersey carries no charge for interest on bonded indebtedness. Consider the fact that the interest alone for debt service in the neighboring State of New York for 1918-19, amounted to \$8,841,060.00, or nearly as much as the total amount of our New Jersey budget for all purposes, and all must agree that our plan of "paying as we go" has economical features of distinct value.

In conclusion, it is most gratifying to realize the substantial results attained through New Jersey's gradual evolution to a business method of conducting State affairs. Starting with the consolidation of departments under the original economy and efficiency bills; quickly followed by the creation of the State Purchasing Department; then the Executive budget; the further development of consolidation through the Charitable and Correctional institutional legislation of last year and the concentration of all highway problems into one department; to-day the business of the State is in a clear, concise and well-organized position.

The additional power delegated to the State House Commission to supplement appropriations and meet emergencies, after careful investigation, superseding the old method of the entirely indefensible and ill-digested supplemental bill, has provided an executive board in the State that has brought all the activities of the Government into close relationship and has permitted the Governor and all future Governors the opportunity of really managing the business of the State. In administering the emergency appropriation, Comptroller Bugbee and Treasurer Read have given painstaking co-operation and support.

It is with much personal gratification that in submitting this, my last budget to your Honorable Body, I can thus present through you to the people of New Jersey a business organization which only requires continued co-operation and a realization and acceptance of the new note in governmental business and which permits comparisons between the new policy of the State and that of successful private business such as must be a matter of pride and satisfaction to all of us.

There have been unusual difficulties in preparing this budget,

because at the time it was necessarily undertaken the country was still at war, with continually mounting prices and a scarcity of labor. In this connection I wish to give special credit to Mr. Henry B. Fernald and Mr. Marvin A. Riley, special assistants, for their indefatigable service and intelligent study of the problem. Some of the requests originally submitted contemplated large extensions in war work and big increases in anticipation of continued extraordinary expenses due to war. The obvious duty to eliminate or revise these, in view of changing conditions anticipated by the recent signing of the armistice, will explain in most instances the radical differences between requests and recommendations. Because of rapidly changing conditions some further revisions may be wise, and the budget is submitted to your Honorable Body with full confidence that the Appropriation Committees of the Senate and House of Assembly will give every consideration to these unusual problems.

Respectfully submitted,

WALTER E. EDGE,

Governor.

AVAILABLE FOR APPROPRIATION FOR THE FISCAL YEAR
BEGINNING JULY 1, 1919, AND ENDING JUNE 30, 1920.

TRENTON, N. J., January 2, 1919.

Hon. Walter E. Edge, Governor:

I have transmitted to you under separate cover a statement of the financial condition of the State estimated at the time of the filing of my annual report, June 30, 1918.

Between June 30, 1918, and January 1, 1919, however, the receipts have been greater than could possibly have been estimated on the first-named date. Indications as of this date would warrant an estimate of receipts amounting to \$9,800,000.00, which would leave the State a free balance of \$3,000,000.00, or possibly \$3,500,000.00, available for appropriation for the next fiscal year.

Respectfully,

NEWTON A. K. BUGBEE,

Comptroller of the Treasury.

STATE OF NEW JERSEY,
OFFICE OF THE COMPTROLLER OF THE TREASURY,
TRENTON, N. J., July 15, 1918.

Honorable Walter E. Edge, Governor:

Pursuant to the provisions of Section 7, Chapter 15, Laws of 1916, the State Treasurer and State Comptroller jointly transmit the following summary of the financial condition of the State in condensed form, together with an estimate of the probable sources of revenue, and the State's income available for appropriations for the fiscal year ending June 30, 1920.

The fiscal year of the State was changed to begin on the first day of July, and end on the thirtieth day of June, on and after July 1, 1918, pursuant to the provisions of Chapter 144 of the Laws of 1918, therefore, the statements of receipts and disbursements are made from November 1, 1917, to June 30, 1918, a period of eight months, which constituted the fiscal year, as changed by the act referred to:

STATE FUND.

Gross receipts, June 30, 1918,	\$16,517,909 55
Balance, October 31, 1917,	6,395,705 22
Total,	\$22,913,614 77
Gross Disbursements,	13,457,544 46
Balance, June 30, 1918,	\$9,456,070 31

The cash balance in the treasury at the close of the year amounted to \$9,456,070.31, an increase over the balance at the close of the preceding year of \$3,060,365.09. The increase in the balance June 30, 1918, is accounted for from the fact that the payment of Railroad Tax, 1917-1918, received during the year, is not disbursed to counties for school purposes until September 1, 1918. This payment approximates \$3,000,000.00.

The balance June 30, 1918, incident to State Fund, is as follows:

Balance, June 30, 1918,	\$9,456,070 31
Allotment of Railroad Taxes to Counties for School Purposes,	\$3,143,146 62
Amount of Road Tax collected to June 30, 1918, to be transferred to State Road Fund,	25,959 91
	<hr/> 3,169,106 53
Balance, June 30, 1918, for State Uses,	\$6,286,963 78

The State Fund shows receipts over disbursements during the year amounting to \$3,060,365.09, an increase in receipts of \$1,329,555.76, and an increase in disbursements of \$586,653.56, as compared with the preceding year.

The following statement shows in condensed form the gross receipts and disbursements of the State Fund:

DEBT OF THE STATE.

Certificates of the State issued to the Commissioners of the Agricultural College, pursuant to Chapter 417 of the Laws of 1895, amounting to \$116,000.00, is the only debt of the State.

Under an act of Congress of the United States, approved July 2, 1862, entitled "An act donating public lands to the several States and Territories which may provide colleges for the benefit of agriculture and the mechanic arts," there was invested for the benefit of the State Agricultural College the sum of \$116,000.00 in the war bonds of the State, being the proceeds from sales of land scrip. The war bonds have all matured and been paid. Owing to the inability of the Commissioners to invest the said sum of \$116,000.00 conformably to the said act of Congress, which provides, "That all moneys derived from the sale of the lands aforesaid by the States to which the lands are apportioned, and from the sales of land scrip hereinbefore provided for, shall be invested in stocks of the United States, or of the States, or some other safe stocks, *yielding not less than five per centum upon the par value of said stocks,*" the Legislature, at the session

of 1895, passed an act authorizing the Commissioners to transfer and pay over, as money shall be by them received, to the Sinking Fund of this State, and authorizing the State Treasurer and Comptroller to issue and deliver therefor to said Commissioners a certificate of this State to the effect that the State will pay to said Commissioners five per centum annually of the amount so paid into or transferred to the Sinking Fund.

Under an act approved April 8, 1903, the Sinking Fund has been assigned and is now a part of the permanent School Fund of the State.

The assets of the State Fund consist of 1,887 shares of stock of the United Railroad and Canal Company of New Jersey, the market value of which amounts to about \$350,000.00.

The reduction in the request of this department is due to the opinion that it is undesirable at this time to recommend the development of the State Fire Protection service, for which the sum of \$34,590 is requested, and in the further refusal to recommend an appropriation of \$100,000 for mosquito extermination through the adoption of a plan which utilizes inmates of the State Prison and Railway to do the ditch digging required for drainage. It is not thought that convict labor will be available for this work, because of the demands of road construction and other State Use activities. The usual appropriation for mosquito extermination is made to the Experiment Station.

The City of Newark originally agreed to sell the Normal School building to the State for \$420,000.00 and interest at 4 per cent. from February 4, 1916, on deferred payments. The Newark Board of Education has now withdrawn the original offer, but a contingent appropriation is recommended conditioned upon its being accepted by the city. This school has been maintained in the City of Newark as a State institution since September, 1913, starting with 400 students and now having 850 students representing some 14 counties, about 35 per cent. from Essex County. The State has invested over \$70,000.00 for permanent equipment and has to date made total appropriations for the school of \$596,625.00.

* Repairs for 1919 are principally represented in the appropriations for Materials and Supplies.

Food is computed on the basis of 1,200 inmates, at 31c. per day, and 40 employees, at 48c. per day, a total of \$14,500, less \$11,500 estimated production from Leedsburg Farms.

For 1919 Prisoners on Road Work, estimated at 200, are not included in the state population, since their maintenance and guarding is chargeable against Road Camp earnings. For 1920, all prisoners are included in the stated population, and all maintenance and guarding of prisoners on road work is to be paid from the Prison appropriation, for which an allowance of \$1.25 per day will be made from State Use Funds giving rise to the receipts as here estimated.

The request as made asks most of its heavy increases because of the war conditions existing when the request was presented and which, it was then assumed, would be even more burdensome next year.

With the war over, it is felt that the appropriation of \$79,640.00, as recommended, will allow for the necessary increase in activities, as compared with the former appropriations of \$43,000.00 for the fiscal year 1917 and \$50,280.00 for 1918.

It is further requested that a contingent appropriation be made of \$135,000.00 to provide plant and equipment for new industries. It is now contemplated that a school furniture industry should be established at the prison (requiring \$35,000) and a plant at Annandale for furnishing ground limestone to farmers (requiring \$100,000). Definite plans have not, however, been perfected, so that final appropriation of these amounts cannot be asked. It is therefore requested that a fund of \$135,000.00 be appropriated to the State House Commission to be applied by such Commission for the establishment of these industries, if in their judgment the final plans to be presented by the Department of Charities and Corrections should warrant it.

By Chapter 32, P. L. 1917, "The Rutgers Scientific School, being the State Agricultural College, the State College for the Benefit of Agriculture and the Mechanic Arts, maintained by the 'Trustees of Rutgers College in New Jersey,' and under the general powers of supervision and control of the Board of Visitors of the State Agricultural College, be and hereby is also designated the 'State University of New Jersey under the same general powers of supervision and control of the same board of visitors.'" This does not seem to cover the newly organized "College for Women" and the appropriation of State funds for its maintenance is not therefore recommended.

Messrs. Ackerson, Allen, Barber, Bright, Brown, Case, Conrad, Edwards, Fithian, Haines, Hammond, Mackay, Martens, Pilgrim, Smith, Sturgess, Wells, Whitney—18.

The following communication from Mr. Runyon (President) was read:

January 20th, 1919.

Gentlemen of the Senate:

I shall not be able to attend this week's sessions of the Senate, and it is with deep regret that I announce the fact.

Early Sunday morning, after an illness of but few hours, our baby boy, a little sojourner with us since September last, was taken away, and his going has broken a wonderfully happy home circle, and left our hearts desolate. Under the circumstances I know you will pardon my absence.

In order that the business of the State may proceed without interruption, I am sending to Mr. Albright the necessary designation of Senators to perform the duties of the Chair, both for to-night's session, and for the session which will probably be held to-morrow, and also the committee appointments.

That these appointments have been the subject of criticism in certain respects, I am fully aware. In reply thereto may I say this:

In compiling the list of appointments my first concern has been for the interests of the State, and in comparison with these interests, other features sink into insignificance. While it is very probable that I have erred in some respects, I pledge you that in performing this duty allotted to me, I have not been swayed by any thought of discourtesy or unfriendliness. Indeed, I should be most unhappy if I could charge myself with any conscious act of unfairness.

To my mind every committee offers to its members the opportunity for honorable public service, and I am sure that in the last analysis no one will deny it, nor claim that personal likes or dislikes, individual seniority or service, are worthy to be reckoned as important when compared with the higher and bigger things to be expected of us as partners and servants of the public.

If, on certain committees, the members look at their problems from different angle points, and through different eyes, and are yet guided throughout by a proper sense of their obligations to the State, I believe that in that very difference the public interests will be enhanced, and each problem will receive broader and more comprehensive treatment than could otherwise be the case.

In order to attain all the harmony possible, and at the same time to further, rather than to lessen the Senate's efficiency, I am making a few changes in the committees as compared with the list originally published, all of which you will see.

And now, in conclusion, may I ask each Senator to accept his appointed tasks in the cheerful spirit of service, and give to the State the very best that is in him. Anything less is neither justice to him who gives nor to those who receive.

You will know, I am sure, that, by reason of the conditions under which I am laboring, my greatest desire is to leave far

behind anything which smacks of smallness of soul, or has in anywise to do with that which is sordid or mean.

In the discharge of my duties I need the support and the friendship of you all, and simply, whole-heartedly and unaffectedly I ask you for it. In return, let me assure you, without reserve, that from my own being a spirit of warm and cordial friendship goes out to every one of you.

And for the future I ask for nothing better than the opportunity to serve shoulder to shoulder with you, and be spent in the service of the State we love.

Yours with sincere and affectionate regard,

(Signed) WILLIAM N. RUNYON.

The following message was received from the Governor, by the hands of Mr. Croasdale, his Secretary, which was read as follows:

January 20th, 1919.

To the Senate:

After consultation with producers in our State and in an effort to assist them and the public to the end that some equitable agreement may be reached, I herewith call the attention of the members of your honorable body to the importance of securing an immediate investigation into the difference existing between milk producers and distributors. The present situation has caused a great deal of public inconvenience, besides menacing the lives of infants, and I feel that the immediate institution of an investigation is vitally necessary in justice to all interests concerned in the controversy, the public included. The uncertainty concerning the organization of the House of Assembly

raises a doubt as to whether the creation of a commission could be immediately effected through the means of a joint resolution, which I appreciate would be the course necessary in order to clothe the commission with adequate powers. Nevertheless, if the Senate takes cognizance of this situation and takes steps providing for the immediate creation of an investigating commission, there is nothing to prevent the latter from organizing and accomplishing preliminary work pending such time as such commission may be clothed with additional authority, if the latter is found necessary.

I feel you will agree with me that New Jersey dairymen and distributors ought to be officially represented in any investigations which are now in progress in the eastern section of the country respecting an adjustment of this situation.

Respectfully,

WALTER E. EDGE,
Governor.

[SEAL.]

FRANCIS E. CROASDALE,
Secretary to the Governor.

Mr. Allen offered the following resolution, which was read:

WHEREAS, The public has been seriously affected by differences between dairymen and distributors in the milk industry, and these differences, while temporarily adjusted, have not been settled in a permanent way; and

WHEREAS, Immediate action is necessary on the part of constituted authorities of New Jersey, in order that this State and all its interests concerning the milk industry be represented at any investigations into the subject, notwithstanding the fact that the immediate passage of a joint resolution authorizing the appointment of such representatives by law may be impossible because of the uncertainty over the organization of one branch of the Legislature; now therefore, be it

Resolved by the Senate of the State of New Jersey, That the Governor be requested to appoint a commission of six members, to serve without salary, to begin immediately to survey the subject of production and distribution of milk and other dairy products; the system of fixing prices, both to producer and consumer; and all matters relative thereto; said commission to render a report to the Senate with a view to formulating and suggesting remedial legislation on this subject in the interest of the general public welfare; and be it further

Resolved, That the said commission be requested to sit at such times and places as a majority may decide, and that in order to carry out the provisions of this resolution, all departments of the State Government are hereby requested to render such assistance to the Commission as may be practical.

The following message was received from the Governor, by the hands of Mr. Croasdale, his Secretary, which was read as follows:

STATE OF NEW JERSEY,
EXECUTIVE DEPARTMENT,

To the Legislature:

March 10th, 1919. }

I deem it imperative at this time to submit a recommendation with reference to the various bills now pending, awaiting your consideration, which provide for increases in the salaries of public employees. In doing so I am positive it is not necessary for me to assure you that I haven't any desire whatever to suggest what your action should be with any individual measure. I have opportunity to express my view later. On the other hand, it seems to me in view of the facts that some co-operation in a matter of this kind is in the interest of a businesslike handling of the subject.

I agree that reasonable increases from time to time in the compensation of public officials is perfectly justifiable when these increases conform with increased duties or greater responsibilities, or when they operate proportionately with unavoidable increases in the cost of living. Otherwise, the salaried servant of the public would be treated inconsiderately and with prejudice. But I emphasize, and I know you agree with me, that any such increases must be reasonable and justified by the facts, else you and I are delinquent in our public obligations and faithless to our trust of carefully guarding the public treasury and consci-

entiously managing the people's business as we would manage our own.

One of the measures to which I refer provides, in a single bill, for certain specified increases in the salaries now paid the Chancellor and Chief Justice, the Vice-Chancellors and Associate Justices and Circuit Court Judges. I seriously question the advisability of this proposed "blanket" method of increasing salaries. It savors too much of the "rider" expedient whereby undesirable legislation frequently travels through on the back of legislation that is desirable and popular. Some of the increases authorized by this bill, if it passes in its present form, might be merited and others quite the opposite, so that when it reached the Governor he would be obliged either to approve all of the increases in order to enact those which were justified or accept the alternative of disapproving the bill, nullifying increases which were necessary and fair, in order to prevent an imposition upon the public with respect to the others. I desire to state very frankly that in the event of such a contingency I should not hesitate an instant to take the latter course.

In order that no injustice may be done, either to individuals or to the State, and that the Legislative and Executive branches of the government have a fair opportunity intelligently to study the economic problems of making public salaries conform with work and living costs, might it not be possible for representative committees of the Senate and Assembly to consider all salary bills in relation to each other so that the final action of the Legislature as to offices of the major grade may be in conformity with the State's policy as to the offices in the minor grade, under Civil Service? In other words, increases would be consistent and uniform as to all offices, rather than arbitrary and partial. I believe that such a plan will greatly facilitate legislation and give satisfaction.

Respectfully,
WALTER E. EDGE,

Attest:

FRANCIS E. CROASDALE,
Secretary to the Governor.

The following message was received from the Governor, by the hands of Mr. Croasdale, his Secretary, which was read as follows:

April 1st, 1919.

To the Senate:

I return herewith, without my approval, Senate Bill No. 79.

This bill, in the form of new legislation, authorizes the board of chosen freeholders in any county of the first class wherein there is now or hereafter may be established by law a county board of health, to appropriate such sum or sums of money as said board of health shall from time to time certify to the said board of freeholders as necessary for the construction, repair, equipment and maintenance of a public hospital for such county for treatment of contagious diseases or cases of a contagious nature.

The subject matter of this proposed legislation has received legislative attention since 1889, and the amount authorized to be appropriated for such purpose has always been limited by the Legislature. In 1917, by chapter 257, of the Session Laws of that year, the limitation was placed at a sum not to exceed \$7,500 in any one year.

If the real purpose of this act is to construct a new hospital, or to repair, enlarge or rebuild a present hospital building, ample authority so to do is given under the Home Rule Act of 1918, relating to counties (P. L. 1918, chapter 84).

If the only object sought by the present bill is to remove all limitation upon the amount that may be appropriated each year for maintenance, then that object should be accomplished by

amending the law of 1917. By this procedure public attention would be drawn to the removal of the limitation in the existing law and the conferring of unlimited power to appropriate, and the taxpayer given an opportunity to express his views as to the advisability of the change.

If the limitation in the existing law does not admit of appropriations sufficient to maintain a present hospital, authority to increase such appropriations to an amount sufficient for such purpose would, no doubt, meet with public endorsement as it would with executive approval.

Bills should not seek to accomplish, in specific instances, by general form, what in fact are amendments to particular statutes, and applicable only in a certain county or municipality.

For these reasons the bill cannot have my approval.

Respectfully,

WALTER E. EDGE,
Governor.

Attest:

FRANCIS E. CROASDALE,
Secretary to the Governor.

Memoranda of Bills Originating in the Senate and Filed
in the State Library by Governor Walter E. Edge
Without His Approval, 1919.

SENATE BILL No. 41.

April 12, 1919.

To the State Librarian:

I herewith file in the State Library, without my approval, Assembly Committee Substitute for Senate Bill No. 41.

This bill attempts to define floating indebtedness and to authorize and direct the funding of floating indebtedness and other indebtedness in any municipality of the State, and appears to be a re-enactment of chapter 153 of the Laws of 1917, except that it extends the provisions of that act to later dates and also *provides that its provisions shall only be effective in municipalities which have not made a tabulation of outstanding indebtedness as provided in chapter 153 of the Laws of 1917.*

The query that arises in this case is whether or not the italicized portion above limits the application of this act in such a day as to create an unconstitutional classification, and I am inclined to believe that it does, especially in view of a decision in the case of *Murphy v. Long Branch*, 61 Atl. 593, Public Laws of 1905, page 407, attempting to validate proceedings by cities, being limited to cities "heretofore voting," which act was held to be special legislation, and, therefore, unconstitutional.

Therefore, approval is withheld.

Respectfully,

[SEAL.]

WALTER E. EDGE,

Attest:

Governor.

FRANCIS E. CROASDALE,

Secretary to the Governor.

SENATE BILL No. 61.

April 14, 1919

To the State Librarian:

I file herewith in the State Library, without my approval, Senate Bill No. 61.

This bill, in reality, raises the salary of helping teachers over fifty per cent., which would seem an unusual raise. I would

58 Sen Jour (901)

have been very glad to approve this bill if the system put into effect two years ago had been adopted; that of automatic raises for continuous service, instead of the arbitrary raise, whether the helping teacher had been employed one year or ten.

Again, I object to the bill striking out the provision of the act it amends wherein all such appointments must be approved by the State Board of Education as well as the Commissioner.

Respectfully,

[SEAL.]

WALTER E. EDGE,
Governor.

Attest:

FRANCIS E. CROASDALE,
Secretary to the Governor.

SENATE BILL No. 64.

April 15, 1919.

To the State Librarian:

I file herewith in the State Library, without my approval, Senate Bill No. 64.

Two different plans for meeting the possible emergency of a wholesale and retail liquor license payment after July first have been proposed by the present Legislature. Senate Bills 64 and 65 comprise one plan, a plan of paying for license fees in monthly installments; and Assembly Bill No. 20 provides the other plan, of paying the entire license fee as usual but with the proviso that in case of prohibition there shall be a rebate to the licensee based on the proportion that the period of prohibition for the year bears to the total license fee of the fiscal year. Of course, to adopt both plans would be confusing, and I have chosen the plan proposed in House Bill No. 20 as the better of the two. Therefore, I file this Senate Bill in the Library without my approval.

Respectfully,

[SEAL.]

WALTER E. EDGE,
Governor.

SENATE BILL, No. 81.

April 17, 1919.

To the State Librarian:

I herewith file in the State Library, without my approval, Committee Substitute for Senate Bill No. 81.

This bill was undoubtedly intended to serve a good purpose, but after careful investigation I believe that the home rule legislation of the State covers the subject thoroughly. Paragraph 8, Article 25, of the Act of 1917, known as the "Home Rule Act," provides that the owner or tenant of lands abutting or bordering upon the sidewalk of public streets, etc., may be required to remove grass, weeds or other impediments by ordinance. If this section does not cover the specific power sought by the bill under consideration, the same should be conferred by amendment to the home rule act and not by another particular law. Otherwise we would be drifting off into the same condition that existed before the enactment of home rule legislation.

In the interest of systematic and easily accessible municipal legislation, I am withholding my approval from this bill.

Respectfully,

[SEAL.]

WALTER E. EDGE,
Governor.

Attest:

FRANCIS E. CROASDALE,
Secretary to the Governor.

SENATE BILL No. 91.

April 15, 1919.

To the State Librarian:

I herewith file in the State Library, without my approval, Senate Bill No. 91.

There is no proviso in the bill to the effect that the act does not apply in the event that the recital in the preamble is true.

It cuts off the claims of any person which are founded upon claims granted by the State of New Jersey. In other words, it vests the title in the party named in the act to the exclusion of any person or persons who may have received an interest in said lands directly from the State. What was intended, no doubt, was to cut off the interest of the State itself, but the act goes further than that and precludes anyone claiming from the State Treasurer, or in any other manner from the State itself.

Respectfully,

[SEAL.]

WALTER E. EDGE,
Governor.

Attest:

FRANCIS E. CROASDALE,
Secretary to the Governor.

SENATE BILL No. 106.

April 17, 1919.

To the State Librarian:

I herewith file in the State Library, without my approval, Senate Bill No. 106.

I regret exceedingly the necessity of filing this bill without my approval, as it bears evidence of a great deal of hard, conscientious work and of remarkably careful preparation. However, in going over the bill section by section and as a general

proposition with legal experts and with men experienced in the practical operation of our election laws, I am convinced that the enactment of this codification would serve only to add to the confusion which already exists with reference to the election laws of the State. The bill does not contain any specific repealer, but merely provides that any act or parts of acts inconsistent with Senate 106 are repealed. The effect of this would be to oblige anyone endeavoring to find out what the law of the State was on any particular question to consider the codification along with every other election act now on the statute books. The confusion that would result is manifest. Certainly, any codification which requires such a painstaking reference to all previous legislation on the subject of elections is not a good basis for codifying and beginning anew. It occurs to me that when any codification of election laws was attempted the method adopted for home rule legislation ought to be followed—that is, the codification should be made to take effect a year in advance of its enactment and there should be specific repealers of each and every statute relating to the subject codified, so that municipal officials, State officials, and others conversant with the practical workings of election laws would have ample opportunity to study the proposed codification and to call the attention of the Legislature to any errors or amendments found necessary at a succeeding session of the Legislature in advance of the date of the act becoming effective.

I have found a number of more or less serious omissions and errors in going over the various sections, but these are for the most part of a trivial nature, and I should have unhesitatingly approved of the codification but for the general and fatal defect referred to.

Respectfully,

[SEAL.]
Attest:

WALTER E. EDGE,
Governor.

FRANCIS E. CROASDALE,
Secretary to the Governor.

SENATE BILL No. 149.

April 15, 1919.

To the State Librarian:

I herewith file in the State Library, without my approval, Senate Bill No. 149.

Chapter 152 of the Laws of 1917 (the "Home Rule" Act)

to purchase engines, apparatus, equipment, etc., for the fire department.

Chapter 252 of the Laws of 1916 confers authority for the issuing of bonds for the purchase of fire engines, etc., which bonds shall mature in not exceeding ten years. Another section of this same act permits the issuance of temporary improvement notes or bonds, but compels them to mature in one year.

Chapter 243 of the Laws of 1918, by section 4, requires the Sinking Fund Commission of each municipality to make calculations of sinking fund requirements for the year and to include the amount necessary to retire the proportionate share of the bonds or indebtedness during that fiscal year to be included in the annual budget and tax ordinance.

Therefore, there is at present sufficient legislation upon the statute books to permit a town or village to carry out the purpose of this act without any additional legislation. It has been the policy of the Legislature during the last few years to delegate to municipalities powers by general laws, and it seems inexpedient now to nullify that action by the passage of special acts for particular cases.

Respectfully,

[SEAL.]

WALTER E. EDGE,

Attest:

Governor.

FRANCIS E. CROASDALE,

Secretary to the Governor.

SENATE BILL No. 158.

April 14, 1919.

To the State Librarian:

I file herewith in the State Library, without my approval, Senate Bill No. 158.

While the raise from \$300 to \$600 for the purpose of superintending the burial of soldiers where the family or friends cannot be found does not seem excessive, at the same time it appears to me that this is hardly a responsibility which ought in the first place even call for a special salary, but rather should be handled by the authorities who would ordinarily look after such a responsibility. I see no reason for the increase.

Respectfully,

[SEAL.]

WALTER E. EDGE,

Attest:

Governor.

FRANCIS E. CROASDALE,

Secretary to the Governor.

SENATE BILL No. 178.

April 15, 1919.

To the State Librarian:

I herewith file in the State Library, without my approval, Senate Bill No. 178.

I heartily approve of the humanitarian purpose of this bill, but I withhold my approval for the following reasons: First, because the title is defective in that it is apparently intended to amend chapter 147 of the Laws of 1918, but fails to do so; second, the section mentioned as amended in the bill does not appear in chapter 147 of the Laws of 1918; and third, I feel that this bill ought not to become a law at this time for the reason that the entire subject should be taken up and a comprehensive revision provided according to a carefully thought-out plan devised by the State Department of institutions and agencies and the courts.

Respectfully,

[SEAL.]

WALTER E. EDGE,
Governor.

Attest:

FRANCIS E. CROASDALE,
Secretary to the Governor.

SENATE JOINT RESOLUTION No. 2.

April 12, 1919.

To the State Librarian:

I herewith file in the State Library Senate Joint Resolution No. 2, for the reason that the sum of money required to carry out the provisions of this Joint Resolution has not been included in the Appropriation Bill as passed by the Legislature.

Therefore the resolution, if enacted, without the necessary funds, would be inoperative, and cannot, for this reason, have my approval.

Respectfully,

[SEAL.]

WALTER E. EDGE,
Governor.

Attest:

FRANCIS E. CROASDALE,
Secretary to the Governor.

SENATE JOINT RESOLUTION No. 3.

April 14, 1919.

To the State Librarian:

I herewith file in the State Library, without my approval, Senate Joint Resolution No. 3.

Nothing can be accomplished by appointing a commission to do business, for which no appropriation is made. The rule of the State House Commission is that they cannot appropriate any money from the Supplemental Fund except to supplement an appropriation of a department already recognized and for which money has been appropriated by the Legislature. If the State House Commission assumed the power to finance propositions that had not been so recognized by previous legislative enactment it can readily be seen where a justifiable criticism of the Commission's actions would most naturally follow.

Respectfully,

[SEAL.]

WALTER E. EDGE,
Governor.

Attest:

FRANCIS E. CROASDALE,
Secretary to the Governor.

SENATE JOINT RESOLUTION No. 4.

April 12, 1919.

To the State Librarian:

I herewith file in the State Library, without my approval, Senate Joint Resolution No. 4 for the reason that the funds necessary to carry out the provisions of the resolution were not included in the annual appropriation bill, and, therefore, the resolution, even if approved, would be inoperative.

Respectfully,

[SEAL.]

WALTER E. EDGE,
Governor.

Attest:

FRANCIS E. CROASDALE,
Secretary to the Governor.

LEGISLATIVE RECORD, SESSION OF 1919.

Disposition of Bills and Joint Resolutions Introduced During the One Hundred and Forty-third Session New Jersey Legislature.

Convened Tuesday, January 14th, 1919. Adjourned, Friday April 11, 1919. Duration, Thirteen Weeks.

An equal political division in the Assembly membership prevented the organization of that branch until the fifth week of the session, when the election of a Speaker and organization of the House was determined by lot. The effect of this delay retarded the work of the session to such an extent that only 80 bills, 42 Senate and 38 House, were delivered to the Governor up to the close of the twelfth week of the session, and the remaining 251 bills and 12 joint resolutions which passed both houses did not reach the Executive Department until the closing hours, leaving the Governor but five days to dispose of more than three-fourths of the proposed legislation which both houses had under consideration for two months.

During the session a total of 760 bills and 21 joint resolutions were introduced, of which number 245 bills and 8 joint resolutions originated in the Senate and 515 bills and 13 joint resolutions originated in the House of Assembly. Of that total 331 bills and 12 joint resolutions passed both houses and were delivered to the Governor, leaving a total of 499 bills and 12 joint resolutions that failed to reach final passage. The Governor approved 261 bills and 9 joint resolutions, making a total of 270 laws for the session of 1919 as against 295 last year. Of the total number of bills and joint resolutions presented to the Governor, executive approval was withheld from 53 bills and 3 joint resolutions, all of which were returned to the house of origin with a veto and later sustained, or filed in the State Library. The Governor also returned to the Legislature by request a total of 21 bills and joint resolutions, 19 of which were returned a second time, 17 becoming laws, and 2 were vetoed. Of the measures from which executive approval was withheld, 11 bills and 3 joint resolutions originated in the Senate and 42 bills in the House. Of the laws for 1919, 116 bills and 4 joint resolutions originated in the Senate, while 145 bills and 5 joint resolutions originated in the House.
